[REDACTED]

[REDACTED]

[REDACTED] - Electric Ballroom

[REDACTED]

Thank you all for your attendance.

THE NEXT MEETING DATE IS
WEDNESDAY 6th September 2023

[REDACTED]

A few notes from the meeting:

As the summer months are upon us **More tourism brings more crime!!!!**

Its been noticed that the police seem to be more focused on the shops/business
in the area.

Thoughts are that they need to be more focused on the overall people in the

area and not just business.

It was suggested that the police have towers located along the highstreet and in the market so they have a better presence and larger overview of the area for communication purposes and as a derterrant.

CCTV has informed us there is an operation happening on the **22nd of July** 9 PM till late.

There will be 2/3 officers in the CCTV monitoring room and several others on the High Street to tackle violence and harassment against women.

Sexual Offences have been reported to be on the up in the area.

Electric Ballroom have reported

Queue Harrasment & large groups loitering around after hrs

Might be an idea if the police are able to leave a van in the area..... it might deter people as its difficult to control the nighttime after hours groups.

CTU have repoted that Homeless issues are also on the rise, and this causes more drug activity.

There are a few new faces in the area also.

The drug dealers are becomming more astute.... they seem to be using Dogs to hide the drugs.

ie. the dog is trained and will sit on the drugs and not move untill the dealer says so.

Anyone else approcahing will be scared off by the dog.

Once again the issue of the Safe Space Hub being located in the wrong area came up again... do we know who to contact to talk about how to get this moved to a more safe and central location?

We still need to compile a list of the business that are registered with Safer Space... and also try to see where the gaps are for business that are not registered, and help them to register.

Sara will be looking into this over the next few weeks, so please get in touch if you have questions or your business is not registered for safer space.

Please get in touch with [REDACTED] to add your business to the list.

The rest of this email contained information about the use of radios and CCTV data with several mentions of names and contact details. Information that is not relevant to this hearing and has therefore been removed.
