

### Appendix 3. Proposed Enabling Approach for Care and Support at Home

Camden's ambition is that an enabling approach will run through all care and support provision and there will to be opportunities for a person's support plan to change at any point.

The diagram below is based on step-down from hospital and is intended to illustrate opportunities for a person's support to change during reablement and ongoing care. While the support drawn down by residents may change and fluctuate, an enabling, person-centred and trauma informed approach will be constant.
